Summary

Data analytics professional with a proven track record of leveraging data to drive process improvements, gained through both the Google Data Analytics Professional Certificate and experience as a Process Engineer. Demonstrated proficiency in data analysis workflows and utilizing tools like SQL, Spreadsheets, Tableau, and R for effective data manipulation and visualization.

Education

Drexel University

Bachelors of Science in Biomedical Engineering, focus in Human Performance and Biomechanics

Philadelphia, PA

Graduated: June 2021

Google

[Data Analytics Professional Certificate](#)

Completion: March 2025

Honors & Awards

A. J. Drexel Scholarship

September 2016 - June 2020

Experience

Zimmer Biomet

Remote

Clinical Engineer I

Sept 2025 - Current

- Analyzed data workflows and tracked metrics for 1,500+ clinical cases to optimize operational throughput.
- Processed complex volumetric DICOM data and applied 3D spatial modeling to design precise patient-specific instruments.
- Monitored logistics data pipelines across cross-functional teams to ensure 100% on-time surgical case delivery.
- Conducted statistical design validation and quality data analysis on 3D guides, reducing production re-work by 80%.

Paragon 28

Denver, CO

Process Engineer I

Jul 2021-Jul 2024

- Reduced case completion time by 50% by identifying production trends via statistical analysis and data scripting.
- Streamlined data processing systems, reducing manual errors and lead times by 30%.
- Organized a standardized training process with SOPs to reduce onboarding time by 60%.
- Aided in transitioning data storage to a more organized cloud-based system.
- Worked cross-functionally with the product development, manufacturing, quality, and regulatory teams to test, validate, and improve in-house processes.
- Synthesized findings from feedback sessions with Key Opinion Leaders (KOLs), pinpointing the top three product development areas requiring immediate improvement based on industry benchmarks.
- Provided product training for surgeons and sales representatives.

Globus Medical, INC

Audubon, PA

Regulatory Intern

Sep 2018-Mar 2019

- Analyzed engineering data to compile and submit regulatory documentation for Class II/III devices under FDA and ISO 13485 standards.

Data Analytics Projects

Energy & Emissions

- Designed a dynamic Tableau dashboard displaying visualizations between energy and emission KPIs effectively.
- Developed SQL Scripts to automate extraction, reducing process time.
- Analyzed and fixed data discrepancies, increasing data reliability and reducing potential errors using data validation techniques, using R and SQL.

Skills

- | | | |
|----------------------|----------------------------------|----------------------|
| • Data Analytics | • Google Suite | • Data Visualization |
| • Process Management | • Microsoft Suite | • 3D CAD Software |
| • R | • Project Management | • Quality Assurance |
| • Tableau | • Cross-Functional Collaboration | • QA/QC |
| • SQL | • Medical Instrumentation | • Vendor Management |
